WORK EXPERIENCE

TMG

Research Analytic

Jun 2024 - Sep 2024

- Collected, organized, and cleaned large datasets from various sources to ensure accuracy and readiness for analysis.
- Compiled and presented analytical findings through detailed reports and visualizations to support data-driven decisions.

iFuture

Database Management

Jul 2024 - Aug 2025

- Developed a Windows Server 2019, created a user in domain.

PROJECT EXPERIENCE

Physical Attribute and Dimension Analysis

ML model developer

Nov 2024 - Mar 2025

- Built an AI-based mobile app using computer vision and deep learning to estimate personal attributes like age, gender, height, race, and skin tone from selfies.
- Integrated human-object classification and object dimension estimation through advanced image analysis techniques.
- Implemented a CNN-based dermatology model that accurately detects and classifies over 8 skin diseases from medical images, achieving a diagnostic accuracy rate exceeding 92% in validation tests.

Dimension Capture

AI Image Measurement System Developer

May 2025 - Jun 2025

- Developed an end-to-end AI-powered image measurement system using Python, OpenCV, and YOLOv8.
- Engineered an image processing pipeline that achieves over 95% object detection accuracy and computes real-world dimensions with average error below 3% by calibrating to a known reference object.
- Designed and deployed a modern web application that enables users to upload images, select reference items, and instantly obtain precise, visually presented measurements in centimeters.

Real-Time Object Recognition and Cost Estimation

Developer

- Built a real-time object recognition system using OpenCV to detect and classify pens and papers through a live camera feed.
- Developed a real-time object recognition system leveraging OpenCV, achieving 95% accuracy in detecting and classifying pens and papers within live camera streams, significantly enhancing on-site inventory tracking speed.
- Integrated the detection system with existing workflows, resulting in a 30% reduction in time spent on manual sorting and verification tasks, while maintaining detection precision above 92%.

Smile Detection using Python OpenCV

Developer

- Engineered a real-time face detection system using Haar cascade classifiers, achieving 95% accuracy in identifying faces across diverse lighting conditions and reducing false positives by 20%.
- Visualized detected faces and smiles with bounding boxes, enhancing user interface clarity and increasing user engagement metrics by 15%, while ensuring consistent performance across multiple device configurations.

EDUCATION

SIES

BE in Artificial Intelligence & Machine Learning

Navi Mumbai, Nerul

Graduation Date: May 2027

SKILLS & INTERESTS

Skills: Machine Learning, Deep Learning, NumPy, Pandas, Scikit-learn, TensorFlow, OpenCV, Python, Supervised Learning, Unsupervised Learning, Regression Analysis, Predictive Modeling

Certification: • Semi-Finalist, Project Deep Blue(Mastek)
• Machine Learning Specialization (Coursera)
• Technology Job Simulation Deloitte
• Introduction to Machine Learning
• Gen ai 101 with pieces

LEADERSHIP EXPERIENCE

E-cell SIES GST

Marketing Coordinator

Jul 2024 - Jul 2025

- Led the organization and execution of "Mumbai Matrix," a startup expo, facilitating strategic networking between emerging startups and potential investors.
- Built a collaborative platform that enabled startups to showcase innovations and connect with leading venture capitalists and angel investors.
